

# Managing Environmental Protections Databases

EnProMgr™, Mobizent's Web-based Environmental Protection Management solution provides Departments with the ability to schedule, manage, search and control their inspections, Warnings and Violations.

EnProMgr™, is a comprehensive back-office solution for Environmental Protection Departments that conduct inspections and issue tickets for property, air, noise and water violations. It provides the management and control of critical inspections and Violations by person and property. The solution not only allows the scheduling of inspections but provides routing recommendations for violation beats. The solution also provides approval cycles for violation that required certain levels of approvals. This back-office solution connects automatically to Mobizent's ViolationWorks™ and

InspectCheck™ but also will connect to any type of mobile solution in the field to provide realtime interfaces to the database.

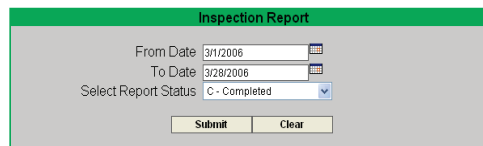

Edit	Law ID	Law Section	Law Description
<a href="#">Edit</a>	3	141	Caused or permitted the emission of air contaminant or water vapor from equipment requiring an operating certificate or registration or unregulated source.
<a href="#">Edit</a>	4	142(a)(l)	Caused or permitted the emission of visible air contaminant from equipment requiring an operating certificate or registration or unregulated source.
<a href="#">Edit</a>	2	220(b)	Used or caused to be used a sound reproduction device for commercial purposes so that the sound there from could be heard upon a public street, park or place.
<a href="#">Edit</a>	1	224	Engaged in or permitted construction activities at other than permitted day and or time.

EnProMgr™ improves violation and inspection management by having an integrated approval module, a complete entry solution can eliminate the need to re-enter data into additional systems and constantly conducting re-inspections.

EnProMgr™ is a cost-effective solution that reduces the amount of time spent on manual Violation forms and manual inspection forms and routing by allowing users to capture all

the required inspection information and approvals on the Website. In addition, EnProMgr™ also provides latest Air, Noise and Water violations that can be searched and managed.

EnProMgr™ ensures that the entire inspection and Violation process is streamlined, from the initial entry of the information through the reporting and data collection analysis, to ensure that Environmental Protection Departments save time and money. EnProMgr™ "Investigative Search" feature provides data analysis and data mapping visualization capabilities to users

Print	Inspection Number	Problem	PROBDESC	Address	City	Comments	IssuedDate	Status
<a href="#">Print</a>	30000256	NM1	NOISE CONSTRUCTION BEFORE/AFTER HOURS	912 INTERVALE AVNUE 10459	Bronx	loud noise from construction before 7:00 a.m. . Construction start at 5:45 a.m. ,for the past 2 to 3 weeks. PLEASE INVESTIGATE.	03/24/2006	C

during any person or property investigation.

EnProMgr™ also provides a complete reporting solution and export features so the inventory can be interfaces with your existing Management Solutions and Courts.

## Features of EnProMgr:

- » Integrated Air, Water and Noise Ordinances
- » Integrated data entry from multiple devices
- » Full reporting and exporting abilities
- » Advanced security features (signature validation)
- » SQL Database
- » Customizable to new Environmental requirements

## Benefits of EnProMgr:

- » Simplifies and streamlines inspection/Violation mgt
- » Reduces paperwork
- » Reduces Carbon Footprint
- » Ensures data integrity
- » Enhances data analysis and visualization
- » Increases productivity
- » Integrates with Department network
