

Mobile Solutions for the Government

Mobizent's mobile solutions for government workers in the field allow managers the ability to better monitor and manage activities and tasks in real-time.

Mobile Solutions - Public Sector:

Mobizent is one of the most successful providers of end-to-end Mobility Solutions for State & Local Governments in the US. As a provider of custom mobility solutions, Mobizent has a proven track record in developing and implementing a broad range of Microsoft Platform based Handheld Solutions and now iPhone applications. While most mobility providers focus on a single component of the solution, our comprehensive solutions include devices, user interface applications, web services and integration functionality as well as helpdesk and support.

Key Differentiators

System Integrator – As an innovative mobile solutions integrator, we match the best products and services we have to our client requirements.

Application Development – We have proven expertise in developing inventive mobile and wireless solutions by customizing our commercial off-the-shelf solutions.

System Support Experience – We have designed, delivered and maintained some of the most complex mobile solutions in the industry.

Some of our Mobile Solutions:

TicketWorks™ – A Violation, Citation and Ticketing solution for Law and Code Enforcement

InspectCheck™ – Solutions for Health, Safety, Fire, Sanitation, Building and Vehicle Inspections

WorkOrderWorks™ – Property Management Tracking System designed to issue and track completion of Work Orders efficiently

AssetWatch™ – Asset Management and Tracking System

ID-MobileWorks™ – Identity Checking System

Our Customers:

San Jose Police Department – Mobizent's TicketWorks™ application streamlines the SJPD data collection process in the field with over 200 handheld units while improving efficiency and data quality and reliability across the City.

New York Sanitation Department – Automation of the existing manual ticketing process with a 'Store & Forward' citation solution; Completed Notices of Violations generated from 350 handheld devices are distributed across seven sites located within the City and uploaded daily.

Rochester Housing Authority – The WorkOrderWorks™ application is running on 62 Motorola MC75 Handhelds units with real time communication. This application will give the Rochester Housing Authority the ability to receive maintenance requests through a call center, automatically assign work orders and have them downloaded immediately in the hands of their maintenance folks in the field. The solution provides an inventory solution that is immediately updated when a maintenance worker uses inventory in the field. The handheld easily swipes the barcode of the inventory item and it is deducted from the main database.

New York Department of Homeless Services – The Outreach and Drop-In Center Project for DHS has eliminated numerous data collection methods being utilized and provided a complete electronic entry system for 50 Handhelds/Tablets and Drop-In Center computers. The application enhances DHS programs' ability to provide a continuum of care to New York City's street homeless population.
