

Managing Warehouses for Manufacturing

ManuFacMgr™, Mobizent's Web-based Warehouse Management solution provide Manufacturing Companies with a automated Warehouse solution to track, manage, map and control inventories.

ManuFacMgr™, is a comprehensive back-office solution for Manufacturing Companies to manage track and control inventories. It provides the management and control of critical inventories by location, customer and person to meet new industry requirements for management and control of inventories. The solution not only provides the standard Purchase Requests and Orders Issuance with approval cycles but also a complete connection to anytype of mobile solution in the field such as WorkOrderWork or ManuCount to provide realtime interfaces to the inventory database.

ManuFacMgr™ improves inventory management by having an integrated Purchase Request, Purchase Order approval module, a complete inventory entry solution provided at remote stations or Handhelds at the loading docks that will eliminate the need to re-enter data into additional systems and constantly conduct inventory counts.

ManuFacMgr™ is a cost-effective solution that reduces the amount of time spent on manual inventory counts and manual Purchase Order routing by allowing users to capture all the required information and approvals on the Website in real-time.

ManuFacMgr™ ensures that the entire inventory process is streamlined, from the initial entry of the information through the reporting and data collection analysis, to ensure that you save time and money. ManuFacMgr™ "Investigative Search" feature provides data analysis and data visualization capabilities to users during any inventory investigation.

ManuFacMgr™ also provides a complete reporting solution and export features so the inventory can be interfaces with your existing General ledger and Tenant Management Solutions

The screenshot shows two overlapping software forms. The top form is titled 'Subject' and includes fields for 'Type: Driver', 'SSN', 'ID#', 'Class', 'Last Name', 'First Name', and 'Middle Name'. The bottom form is titled 'Vehicle' and includes fields for 'Plate', 'VIN', 'State: CA', 'Body Style', 'Color', 'Make', 'Model', 'Year', 'Insurance Comp: Other', 'If Other:', 'Policy#', and checkboxes for 'Commercial Vehicle', 'Hazardous', and 'Owner Responsibility'. Both forms have 'File' and 'Record' buttons at the bottom.

Designed to run on any windows based Mobile Device, including phones, laptops or ruggedized handhelds, ManuFacMgr™ provides highly sophisticated inventory modules that intelligently work together to allow users to monitor and control inventories needed for maintenance and inspection personnel. ManuFacMgr™ also has a set of comprehensive mobile handheld solutions that easily and seamlessly integrates into your own inventory, and other external systems.

Features of ManuFacMgr:

- » Integrated Purchase orders/Purchase requests
- » Integrated Inventory entry from multiple devices
- » Full reporting and exporting abilities
- » Advanced security features (signature validation)
- » SQL Database
- » Customizable to your warehouse requirements

Benefits of ManuFacMgr:

- » Simplifies and streamlines inventory mangement
- » Reduces paperwork
- » Reduces Carbon Footprint
- » Ensures data integrity
- » Enhances data analysis and visualization
- » Increases productivity
- » Integrates with internal network
