

Managing Housing Authorities with mobility

Mobizent's mobile work order and inventory solution is used by Housing Authorities to issue, track and manage critical tasks by their maintenance and inspection staff in the field.

WorkOrderWorks™, Mobizent's mobile property management tracking system, is used by city governments and companies to issue and track completion of Work Orders efficiently. Mobizent's software operates on ruggedized Handhelds and tablets to automate work order issuance and remediation in the field to allow such

things as public housing properties to be made available more quickly, and allow housing authorities to track work completed against voucher applications.

In addition the solution has several comprehensive back-office applications to process the issued Work Orders. The back-office applications can easily

integrate into agency and HUD databases and systems for data interchange.

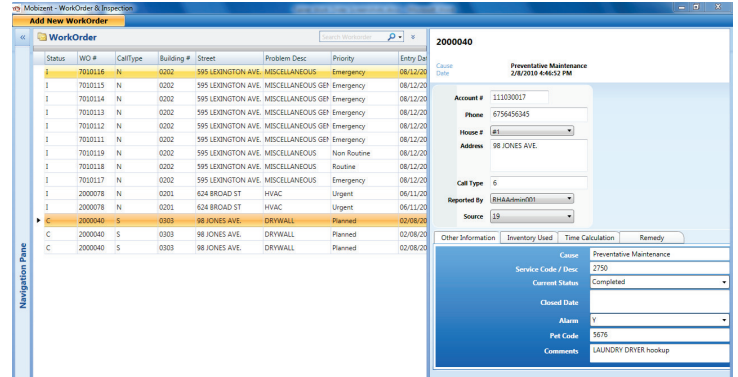

WorkOrderWorks™ improves data collection, assists in enforcing standards, improves the efficiency and accuracy of inventory control, passively tracks your field workers, and eliminates the need to re-enter data into additional systems.

WorkOrderWorks™ is a cost-effective solution that reduces the amount of time spent issuing Work Orders, creates a secure record of the information and automates the reporting process.

WorkOrderWorks™ enables Workers in the

field to accurately and effectively complete, remediate and track Work Orders by entering information on the Handheld devices. Inspectors and Maintenance personnel are given the ability to
